Introduction

This year the Development and Assessment Institute in Waste Water Technology at RWTH-Aachen University (PIA) is arranging a symposium on the treatment of waste water and waste on ships in cooperation with the Ship Safety Division (BG for Transport and Traffic) and the German Shipowners' Association (VDR).

The seas are the largest ecological system of the earth. And yet, seagoing vessels typically used in long-distance traffic and are not limited regionally. Thus, all involved parties need to set common goals and cooperate internationally in order to protect the seas.

Only in this way can solutions be found. In previous symposiums about sewage, bilge and ballast water and flue gas cleaning, the participants became aware of the need for substantial discussion on all of these topics.

Due to this demand, PIA and its partners decided that a 6th Symposium should be arranged.

SOWOS will provide room and enable discussions between all participants in an informal meeting.

SOWOS is a conference for all the parties involved (authorities, certifying bodies, constructors, operators, shipowners, ship yards, etc.).

In addition to the symposium, there will also be a trade exhibition.

This Year's Topics

Ballast Water

Waste Water

Bilge Water

Drinking Water Disinfection

Call for Exhibitors and Sponsors

Companies involved in this matter are invited to support the conference by advertising or renting exhibition space. All sponsors will be acknowledged in the conference.

Venue of the Conference

The conference will be held at the Hamburg Chamber of Crafts in Hamburg (Handwerkskammer), Germany. On the evening of 15th November 2012, there will be a "warm-up" at a traditional restaurant in Hamburg.
